**Notices**

**General Notices**

**Van Houten Fund**

The Van Houten Bequest is a fund left by the late Georges van Houten in the 1950s to be used ‘for the benefit of the University in such ways as the Chancellor, the Vice-Chancellor, and Council shall see fit’. The Chancellor, the Vice-Chancellor, Council and the Planning and Resource Allocation Committee agreed in 2005 to delegate responsibility to the Registrar to approve grants subject to a regular report to be made to Council on the decisions taken.

Bids are now being invited for grants from this fund to be used to support projects that can be shown to offer a broad strategic benefit to the University, but that do not form part of the normal day-to-day operations of a department and which would not easily be funded from other regular sources.

Grants awarded within the last year have included:

- support for the commission of a prestigious art work for the Andrew Wiles Building
- support for Oxford Literary Festival 2016.

Grants to applicants from within the University are usually in the region of £2,000–£12,000, either given as a one-off award or spread over two or three years. Grants are also available to organisations external to the University; in such cases, the amounts awarded are usually lower and there is a cap on the total amount of funding made available to external organisations, which is £25,000 for the current financial year. Certain such projects, which would more appropriately be supported from the University’s Community Fund, will be advised to apply to that fund.

The most recent invitation to bid, in November 2014, attracted nine applications and resulted in awards for seven of those.

The guidelines by which bids are assessed are as follows:

1. Bids for grants will be assessed according to the breadth of the benefit to the University offered by the project in question, the strategic importance of the project to the University and the availability of funds. Only in exceptional circumstances will a grant be awarded in respect of a project which benefits a single department.

2. Grants will not ordinarily be awarded for purposes for which other trust fund (or similar) support exists within the University, for example, the funding of academic scholarships, regardless of whether or not the alternative fund(s) in question are in a position to fund the expenditure proposed.

3. Grants will not ordinarily be awarded in respect of costs for which a department might reasonably be expected to hold a budget.

4. Grants will not ordinarily be agreed in respect of recurrent activities except to provide:

   (a) seed funding to support an activity in its first one to three years; or
   (b) bridging support for one year only where a source of funding is lost and the department/faculty in question is confident that an alternative can be found for the following year.

5. Grants will not ordinarily cover the full cost of a project. Departments will be expected to make some contribution, or to use the grant secured by the Van Houten Fund to assist in securing other funding (including external funding).

6. The extent to which funds may be awarded to external organisations each financial year may be subject to an upper limit, to be set by the General Purposes Committee and reviewed on an annual basis.

The bids will be considered by the Registrar as a gathered field. Bids should be made on the application form which is available from the secretary of the fund or from the Van Houten Fund webpage: www.admin.ox.ac.uk/councilsec/trusts/applying/vanhoutenfund. Applications should be sent, preferably as a Word document attached to an email, to the secretary, Mrs Adrienne Lingard, by noon on 9 December.

Further information may be obtained from Mrs Lingard (tel 01865 61627, email adrienne.lingard@admin.ox.ac.uk) or at the University Offices, Wellington Square, Oxford, OX1 2JD. The next invitation to bid will be in Michaelmas term 2016.

Miscellaneous

UK Brain Bank for Autism and Related Developmental Research, JR
The developing brain is altered in autism but neuroscientists do not know how or why. Research is needed to understand the causes and biological basis of autism, to develop better interventions to improve the lives of those directly affected by it. Such critical research is hindered by the scarcity of donated human brain tissue. Control tissue, donated by people who do not have autism, is needed for comparison just as much as donations by people who do – and the NHS organ donor scheme does not include brain donation. We particularly want younger people to consider making a pledge to donate their brain after death (the further the brain is from its inception, the more difficult it is to understand the process of its development, so we do not take donations from people over 65 not directly affected by autism). See www.brainbankforautism.org.uk for information and to register as a donor.
