# STUDENT NUMBERS SUPPLEMENT, 25 JULY 2007

# Introduction

A new set of Student Statistics tables has been produced this year. These tables represent the result of a review of numbers previously published in the *Gazette*, with the intention of producing data that is up-to-date and relevant to a wide-ranging audience. Web versions of these statistics (including charts in colour) are available on the Student Information Systems (SIS) Web site at http://www.admin.ox.ac.uk/sr/ (follow the link to 'Student Statistics'). In future years it is intended that these statistics will be combined with undergraduate and postgraduate admissions data to produce a single publication, to be published on an annual basis in Hilary term.

The purpose of the Student Statistics tables is to provide an overview of the composition of the student body, based on a 'snapshot' of the student population at the census date of 1 December. The same 'snapshot' also forms the basis of both the Higher Education Student Early Statistics (HESES) return and the Student Number Planning Exercise (SNP), but with slightly different criteria, as specified below. The generation of these statistics on an annual basis will allow for a year-on-year comparison of the Oxford University student body.

# Terms and definitions

These tables are based on a 'snapshot' of the information held in the Oracle Student System (OSS) and also include data on undergraduate Continuing Education students not held within OSS. The following rules apply across all tables:

- All data reflects relevant information as recorded on the census date of 1 December.
- All students enrolled on a programme of study on 1 December are included in these tables with the exception of any students listed below:
  - The statistics do not include any students who were on a period of suspension from their studies, for whatever reason, on 1 December;
  - Unlike HESES and SNP the Student Statistics tables include research students who have gone beyond year four of their programme of study;
  - In common with HESES and SNP, research students who had completed submission of their thesis before the 1 December are not included.
- The figures in all tables represent a headcount of students on the census date as opposed to representing an indicator of full time equivalence. Note that the tables make no distinction with regard to a student's Oxford residency status.
- Tables include attendance type, i.e. full-time or part-time.
- Visiting Students are defined as full-time students spending up to a year in Oxford studying, but not being awarded a degree or other qualification. These are shown as a separate category in each table. These students are not included in HESES and SNP.

Questions concerning the content or format of these tables should be directed to Student Information Systems (telephone: Oxford (2)70144, email: sis@admin.ox.ac.uk).

Table 1: Student numbers summary, as of 1st December 2006 Numbers of students, grouped by gender, for each programme of study for undergraduates and postgraduate taught and by division for postgraduate research. Visiting student numbers are also shown, broken down by status of student. Number of new starters for each programme is reported. For the purpose of this table, new starters are defined as students with a programme attempt start date between 2nd December 2005 and 1st December 2006. Totals are included to provide summary information.

#### Undergraduate Students

| Programme Title                                    | Programme Code |                                       |     | Female       |     |              |     | Male         |     |              | Тс  | otal         |     |

<sup>1</sup> Where students have dual Nationality the following logic was applied in order to determine which Nationality should be included in the Student Statistics. Logic based on the

criteria specified by the Higher Education Statistics Authority (HESA) for reporting students with dual Nationality.

1. If UK is listed as one of the Nationalities report student's Nationality as UK

2. If UK is not one of the Nationalities, but one of the Nationalities is an EU country then report students Nationality as the relevant EU country 3. If relifier of the Nationalities are a UK or EU Country, then, where possible, return the Country that matches with the Country of Domicile for the relevant Programme Attempt <sup>2</sup> Includes countries that were member states of the European Union as at 1st December 2006 only. Bulgaria and Romania are therefore listed under International since they were not admitted to the EU until 2007

### Table 5: Student ethnicity by division and programme type, as at 1st December 2006.

Ethnic origin categories as used by Higher Education Statistics Agency (HESA) for the 2005/6 period. Please note that for Data Protection reasons some numbers have been replaced with an asterisk to avoid identification of individual students.

<sup>1</sup> Censored numbers are included in the column total although divisional location is not suggested by an asterisk. <sup>2</sup> Includes all cases where the information has been actively sought but is still missing

<sup>3</sup> Represents definition no longer used by HESA in 2005/06 although still valid for students who started before 2001/02

## Table 6: Student disability types by division and programme type, as at 1st December 2006.

Disability categories as used by Higher Education Statistics Agency (HESA) for the 2005/6 period. Please note that for Data Protection reasons some numbers have been replaced with an asterisk to avoid identification of individual students.

#### **Undergraduates**
