Consultative Notices

10-year review of the EJRA

Since 2011, the University has maintained an employer-justified retirement age (EJRA), which is currently set at the 30 September before the 69th birthday. It applies to all staff in Grade 8 and above.

The 10-year review of the EJRA will take place this year and Council has now approved the Terms of Reference and membership for the Review Group that will conduct the review. [They can be viewed online.](#)

Details of how the group will consult Congregation and all University staff will be published in due course.

Call for nominations for Honorary Degrees and for Degrees by Diploma

Honorary degrees are conferred annually at Encaenia. Degrees by diploma are conferred on heads of state and royalty. Members of Congregation are encouraged to nominate individuals on whom such degrees might be conferred. Nominations are welcome all year round.

The Honorary Degrees Committee is charged with considering nominations received, consulting Council and making recommendations to Congregation. The committee appreciates the time taken by members of Congregation to bring names to its attention. It will be reconsidering names brought to it in the last three years and hopes to receive a wide and diverse selection of new names to add to those.

When considering possible honorands, the committee will focus on individuals in the following categories:

- 1 those of high academic distinction in the fields of research and scholarship of specific interest to the University of Oxford
- 2 those distinguished in the visual, literary, musical and performing arts
- 3 those distinguished in business and industry
- 4 those who have played a distinguished role in public life, for example in contributing to progress and change in society
- 5 those who have made a significant contribution to the activities of the University of Oxford - such individuals would normally also fall into one of the categories above.

Within the categories above the committee will aim to produce a balanced and diverse list, which takes account of the global dimension that characterises this University's activities. It has adopted a target that at least half of the final list of names proposed to Congregation for the conferment of honorary degrees will be women and/or minorities. Members of Congregation are therefore encouraged to nominate individuals of conspicuous distinction with particular reference to diversity.

Honorary degrees will not be conferred on anyone who holds, or who has retired from, a resident teaching, research or administrative post within the University or in any college or other society, except in exceptional circumstances such as distinguished service outside the terms of his or her paid service. In these circumstances, a proposal for an honorary MA may be put forward.

Nominations for honorary degrees and for degrees by diploma should be submitted on the approved application form, which requires the name of the nominee and a short supporting paragraph. Further information is available at <https://governance.admin.ox.ac.uk/committee-on-honorary-degrees> and [copies of the form are available online](#) (single sign-on required), or from the Secretary to the Honorary Degrees Committee (sarah.cowburn@admin.ox.ac.uk). The completed form should be returned to the Secretary by email under 'Strictly Confidential' cover.

While informal soundings within the University will often be desirable, every effort should be made to ensure that publicity is not at any stage given to any specific proposal for the conferral of an honorary degree. All nominations will be considered in strict confidence by the committee.

The names of people on whom degrees by diploma and honorary degrees have recently been conferred are published in the [University Calendar](#) and [online](#) (single sign-on required).

UK Brain Bank for Autism and Related Developmental Research, JR. The developing brain is altered in autism but neuroscientists do not know how or why. Research is needed to understand the causes and biological basis of autism, to develop better interventions to improve the lives of those directly affected by it. Such critical research is hindered by the scarcity of donated human brain tissue. Control tissue, donated by people who do not have autism, is needed for comparison just as much as donations by people who do - and the NHS organ donor scheme does not include brain donation. We particularly want younger people to consider making a pledge to donate their brain after death (the further the brain is from its inception, the more difficult it is to understand the process of its development, so we do not take donations from people over 65 not directly affected by autism). See <https://grand.tghn.org/autism-brain-bank> for information and to register as a donor.
